

Experimenting..... How to make a waterproof a Pirate Ship

You will need:

paper with a picture on it

materials such as kitchen roll, plastic, bubble wrap, tissue paper cut into squares

glue

squeezy water bottle

water

Method:

1. Draw your pirate ship.
2. Place the squares of material over the picture using glue.
3. Spray water over the picture and observe any changes to the picture.

The Science Bit

Investigation! Does it make a difference if you use more than one layer of the materials that were less good at repelling water?

Can you cut some shapes out of the plastic, stick them on paper and paint over the top to make a picture?

Can you think of any natural waterproof materials?
