

Treasure Chest Paper Model

Treasure Chest Paper Model

Instructions

1. Begin by cutting out the whole shape in one piece. Cut along the thick black line. Be sure to cut between tabs 7 and 8.
2. Fold all dotted lines. Most lines are folded inward, but the dot-dash lines should be folded outwards.
3. Use glue to stick tab 6 to 9, tab 7 to 8 and tab 1 to the front-left of the chest.
4. Carefully bend the back of the lid around the folded sides of the lid. Glue the clasps of the chest to tabs 10 and 11. (The clasps are on the outside of the model next to tabs 4 and 5).
5. Finally, stick tabs 2 and 3 to the inside of the chest. (This can be tricky for the final tab – you may wish to use a small piece of sticky tape to make sure it is stuck).
