## \%MathsHUBS

This policy has been largely adapted from the White Rose Maths Hub Calculation Policy with further material added. It is a working document and will be revised and amended as necessary.

| Objective \& Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Combining two parts to make a whole: part- whole model | Use part part whole model. <br> Use cubes to add two numbers together as a group or in a bar. | Use pictures to add two numbers together as a group or in a bar. | $4+3=7$ $10=6+4$ <br> Use the part-part whole diagram as shown above to move into the abstract. |
| Starting at the bigger number and counting on | Start with the larger number on the bead string and then count on to the smaller number 1 by 1 to find the answer. | $12+5=17$ <br> Start at the larger number on the number line and count on in ones or in one jump to find the answer. | $5+12=17$ <br> Place the larger number in your head and count on the smaller number to find your answer. |
| Regrouping to make 10. <br> This is an essential skill for column addition later. | $6+5=11$ <br> Start with the bigger number and use the smaller number to make 10. <br> Use ten frames. | $3+9=$ <br> Use pictures or a number line. Regroup or partition the smaller number using the part part whole model to make 10. | $7+4=11$ <br> If I am at seven, how many more do I need to make 10 . How many more do I add on now? |
| Represent \& use number bonds and related subtraction facts within 20 | 2 more than 5. |  | Emphasis should be on the language <br> ' 1 more than 5 is equal to 6.' <br> ' 2 more than 5 is 7. ' <br> ' 8 is 3 more than 5.' |

|  <br> Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Adding multiples of ten | Model using dienes and bead strings | Use representations for base ten. | $\begin{aligned} & 20+30=50 \\ & 70=50+20 \\ & 40+\square=60 \end{aligned}$ |
| Use known number facts <br> Part part whole | Children explore ways of making numbers within 20 | $\begin{gathered} 20-\square \\ \square+\square=20 \quad 20-\square=\square \\ \square+\square=20 \quad 20-\square=\square \end{gathered}$ | $\square$ $+1=16$ <br> $16-1=$ $\square$ <br> $1+$ $\square$ $=16$ <br> 16 $\square$ $\square=1$ |
| Using known facts | $\begin{aligned} & \square_{\square} \square+\square_{\square}=\square_{\square^{\square} \square_{\square}} \\ & \square \square \square+\square \square \square=\square \square \square \square \square \square \square \square \end{aligned}$ | Children draw representations of $\mathrm{H}, \mathrm{T}$ and O | $3+4=7$ <br> leads to $30+40=70$ <br> leads to $300+400=700$ |
| Bar model | $3+4=7$ | $7+3=10$ | 23 25 <br> $?$ $23+25=48$ |

|  <br> Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Represent and use number bonds and related subtraction facts within 20 <br> Part Part Whole model | Link to addition. Use PPW model to model the inverse. <br> If 10 is the whole and 6 is one of the arts, what s the other part? $10-6=4$ | Use pictorial representations to show the part. | Move to using numbers within the part whole model. |
| Make 10 | Make 14 on the ten frame. Take 4 away to make ten, then take one more away so that you have taken 5. | Jump back 3 first, then another 4. Use ten as the stopping point. | $16-8$ <br> How many do we take off first to get to 10? How many left to take off? |
| Bar model | $5-2=3$ |  | 8 2$\begin{aligned} & 10=8+2 \\ & 10=2+8 \\ & 10-2=8 \\ & 10-8=2 \end{aligned}$ |

| Objective \& Strategy | Concrete | Pictorial | Abstract |  |
| :---: | :---: | :---: | :---: | :---: |
| Regroup a ten into ten ones | Use a PV chart to show how to change a ten into ten ones, use the term 'take and make' | $\begin{aligned} & \sum_{3}^{3} \sum_{3}^{3} 3 \\ & 20-4= \end{aligned}$ | $20-4=16$ |  |
| Partitioning to subtract without regrouping. <br> 'Friendly numbers' | $34-13=21$ <br> Use Dienes to show how to partition the number when subtracting without regrouping. | Children draw representations of Dienes and cross off. $43-21=22$ | $43-21=22$ |  |
| Make ten strategy <br> Progression should be crossing one ten, crossing more than one ten, crossing the hundreds. | 34-28 <br> Use a bead bar or bead strings to model counting to next ten and the rest. | Use a number line to count on to next ten and then the rest. | $93-76=17$ |  |
|  |  |  |  |  |

|  <br> Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Column subtraction without regrouping (friendly numbers) | Use base 10 or Numicon to model |  | $\begin{gathered} 47-24=23 \\ -\frac{40+7}{20+4} \\ 20+3 \\ \hline \end{gathered}$ <br> Intermediate step may be needed to lead to clear subtraction understanding. |
| Column subtraction with regrouping | Begin with base 10 or Numicon. Move to pv counters, modelling the exchange of a ten into tten ones. Use the phrase 'take and make' for exchange. | Children may draw base ten or PV counters and cross off. |  <br> Begin by partitioning into pv columns <br> Then move to formal method. |
|  |  |  |  |

| Objective \& Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Subtracting tens and ones <br> Year 4 subtract with up to 4 digits. <br> Introduce decimal subtraction through context of money | $234-179$  <br> Model process of exchange using Numicon, base ten and then move to PV counters. | Children to draw pv counters and show their exchange-see Y3 | Use the phrase 'take and make' for exchange |
| Year 5-Subtract with at least 4 digits, including money and measures. <br> Subtract with decimal values, including mixtures of integers and decimals and aligning the decimal | As Year 4 | Children to draw pv counters and show their exchange-see Y3 | $\begin{array}{r} { }^{2} 8^{10} x^{1} 0^{4} 8^{1} 6 \\ -\quad 2128 \\ \hline 28,928 \end{array}$ <br> $\begin{array}{l}\text { Use zeros } \\ \text { for place- } \\ \text { holders. }\end{array}$ $-{ }^{6} 7^{10} X^{1} 694 \cdot 0$  <br>  $-\quad 372 \cdot 5$  <br>   $6796 \cdot 5$ |
| Year 6-Subtract with increasingly large and more complex numbers and decimal values. |  |  |  |

| Objective \& Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Doubling | Use practical activities using manipultives including cubes and Numicon to demonstrate doubling | Draw pictures to show how to double numbers <br> Double 4 is 8 $\square$ $\square$ $\square$ $\square$ $\square$ $\square$ $\square$ $\square$ | Partition a number and then double each part before recombining it back together. |
| Counting in multiples | Count the groups as children are skip counting, children may use their fingers as they are skip counting. <br> $(4)$ $(4)$ | Children make representations to show counting in multiples. | Count in multiples of a number aloud. <br> Write sequences with multiples of numbers. $2,4,6,8,10$ $5,10,15,20,25,30$ |
| Making equal groups and counting the total | Use manipulatives to create equal groups. | Draw to show $2 \times 3=6$ <br> Draw and make representations | $2 \times 4=8$ |

|  <br> Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Repeated addition | Use different objects to add equal groups | Use pictorial including number lines to solve prob There are 3 sweets in one bag. How many sweets are in 5 bags altogether? | Write addition sentences to describe objects and pictures. |
| Understanding arrays | Use objects laid out in arrays to find the answers to 2 lots 5 , 3 lots of 2 etc. | Draw representations of arrays to show understandino | $\begin{gathered} 3 \times 2=6 \\ 2 \times 5=10 \end{gathered}$ |
|  |  |  |  |

| Objective \& Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Doubling | Model doubling using dienes and PV counters. | Draw pictures and representations to show how to double numbers | Partition a number and then double each part before recombining it back together. |
| Counting in multiples of 2, 3, 4, 5, 10 from 0 <br> (repeated addition) | Count the groups as children are skip counting, children may use their fingers as they are skip counting. Use bar models. $5+5+5+5+5+5+5+5=40$ | Number lines, counting sticks and bar models should be used to show representation of counting in multiples. <br> 3 <br> 3 <br> 3 <br> 3 | Count in multiples of a number aloud. <br> Write sequences with multiples of numbers. $\begin{aligned} & 0,2,4,6,8,10 \\ & 0,3,6,9,12,15 \\ & 0,5,10,15,20,25,30 \end{aligned}$ $4 \times 3=$ |

| Objective \& Strategy | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
| Multiplication is commutative | Create arrays using counters and cubes and <br> Numicon. <br> Pupils should understand that an array can represent different equations and that, as multiplication is commutative, the order of the multiplication does not affect the answer. | Use representations of arrays to show different calculations and explore commutativity. <br> $\bigcirc \bigcirc \bigcirc$ <br> $\bigcirc \bigcirc \bigcirc$ | $\begin{aligned} & 12=3 \times 4 \\ & 12=4 \times 3 \\ & \\ & \begin{array}{l} \begin{array}{l} \text { Use an array to write } \\ \text { multiplication sentences and } \\ \text { reinforce repeated addition. } \end{array} \\ \\ \\ \\ 5+5+5=15 \\ 3+3+3+3+3=15 \\ 5 \times 3=15 \\ 3 \times 5=15 \end{array} \end{aligned}$ |
| Using the Inverse <br> This should be taught alongside division, so pupils learn how they work alongside each other. |  |  | $\begin{aligned} & 2 \times 4=8 \\ & 4 \times 2=8 \\ & 8 \div 2=4 \\ & 8 \div 4=2 \\ & 8=2 \times 4 \\ & 8=4 \times 2 \\ & 2=8 \div 4 \\ & 4=8 \div 2 \end{aligned}$ <br> Show all 8 related fact family sentences. |
